CUSTOMER SNAPSHOT

Oscar Associates was founded by three recruitment consultants with proven track records at top firms.

Their experience had taught them that powerful IT systems can give consultants the competitive edge.

But like most start-ups, Oscar didn't have the capital to invest in an enterprise grade IT system.

CHALLENGE

Oscar Associates needed enterprise IT from day one – but like most start-ups, lacked the capital. With Nasstar for Recruitment they didn't have to compromise.

SOLUTION

Nasstar for Recruitment provided Oscar with a corporate IT solution: high performing with layers of resilience – but without the upfront costs.

Oscar Associates were able to play at the highest level from day one,

growing a 3 person start-up to a 60 person multinational with offices in London, Singapore and Houston.

CLIENT VERDICT

Oscar's Matt Holmes comments:

"Nasstar for Recruitment stands out amongst our suppliers for being so heavily invested in us – it's like they're inside the business, not the outside, and that is rare in any outsourced undertaking.

Our problems matter, our future plans are always on their radar, they are ever present, supporting, consulting, advising, trouble-shooting.

Poor IT can cripple a recruitment business, Nasstar for Recruitment understands that and cares about it, and works very, very hard to ensure that we only get the best."
