

DATA SHEET

CYBER SAFETY AND PHISHING AS A SERVICE

Building a more resilient workforce against cyber crime

In the last 12 months, less than 10 per cent of cyber-attacks globally made use of a system weakness. The vast majority exploited “the human factor” - the instincts of curiosity and trust that lead well-intentioned people to click, download, install, open, and send money, or data.

Don’t let your users, or your organisation, become susceptible. Our Cyber Safety and Phishing as a Service provides immersive

personalised, bite-sized security awareness training, that engages with your workforce to test ongoing knowledge and compliance.

Our goal is to help you build a culture in which employees understand how to spot cyber dangers and recognise the value of staying alert. If we’re able to make an employee think twice before they open, download or click, we’re doing our job.

THE NASSTAR WAY

We value your security. Whether you’re a current customer or new to us, our Phishing Risk Assessment is available to you as a standalone service or as part of our broader Cyber Security as a Service offering.

To deliver bespoke training that suits your specific work environment and business needs, our approach is to test, train, report and test again. It’s a continuous process that, over time, will ensure that your employees improve their cybersecurity understanding and play their part in reducing your exposure to cyber risks.

FEEL SECURE WITH NASSTAR

Understanding cyber threats is part of our DNA

**Cyber Essentials
Plus solutions**

**ISO 27001,

‘Best Managed
Security Service’**

**Finalist:
‘Best Incident
Response Solution’**

**Finalist:
‘Best SME
Security Solution’**

KEY FEATURES

Building a human line of defence against breaches

\ Expert Training

We establish your staff's existing knowledge, confidence and risk perception levels and provide personalised training, security advice and updates based on each user's knowledge and confidence. Our people-focused security awareness training and phishing platform provides access to:

- An extensive library of cyber awareness training courses, advice and news
- Phishing campaigns at an agreed frequency

\ Assessment

By keeping the information relevant to your business, we expect your employees to perform better in the end of module tests. We test your staff on their cyber awareness through simulated phishing scenarios to establish user behaviour and the likelihood of being fooled by a malicious threat actor.

\ Reporting

Results are tracked and summarised in simple to understand reports. This enables you to see what works and what doesn't, adapt and continue the education to see improvements within your team, at an ongoing frequency suited to your needs.

\ Remote Training Workshop (optional)

An optional add on to this service is a 30-minute video workshop with our Security Experts. They will discuss the assessment results in detail, explaining where users were caught out, so they are better equipped to defend themselves in the future. This can also be recorded for ongoing training purposes.

With Nasstar's Cyber Safety and Phishing as a Service, you'll benefit from an affordable and highly effective defence against the most common cyber security vulnerability – your people.

REQUEST A FREE SECURITY CONSULTATION

Whatever your size, setup and security training needs, our team can take care of it.

With more than 90% of breaches beginning with an email-based threat, it's more important than ever to ensure your employees are cyber aware and can spot malicious behaviour before they cost you your business and reputation.

If you would like to book a complimentary consultation or find out more about our solutions, please contact enquiries@nasstar.com or call 0844 443 433
