DATA SHEET

NASSTAR PRIVATE CLOUD

Making your business extraordinary

Nasstar's secure private cloud solutions are designed to flex and scale on-demand with your business, allowing you to accelerate innovation, drive business agility, streamline operations and reduce your IT costs.

Using the latest technology from the likes of Microsoft, VMware, Dell EMC, Cisco, and Fortinet our private cloud solutions include cost-effective options based on shared components, all the way up to fully dedicated High Availability solutions with replication between data centres. A rich catalogue of advanced security options is also available to make your cloud experience safe, secure and performant.

Our cloud experts will work with you to design the right solution for your business, carefully considering your operational requirements, business plans, budget, and regulatory compliance environment.

With fully managed, co-managed or self-managed options available we can do as much or as little as you want us to. So, whether you want to free up your IT teams or want to lean on us from time to time we have all bases covered. Regardless of the option you choose, we will be monitoring uptime, availability, and performance to make sure everything is working as it should be 24/7.

THE NASSTAR WAY

With over 20 years of experience in the design, delivery and operation of global technology projects and solutions we know a one-size-fits-all approach is not the answer to cloud success.

We take pride in understanding the needs of your business and make sure we are well informed to provide you with the best advice and guidance, always presenting a choice whilst making the potentially complex simple. Whether it's a Public, Private or a Hybrid Cloud solution we will provide effective cloud migration and management to ensure optimum performance, reliability and security, every time.

KEY FEATURES

The ultimate offering for secure, scalable virtualisation

\\ Guaranteed availability
Our private cloud solutions are designed with resilience and redundancy at their core and guaranteed availability of up to 99.99%* to ensure you are always 'on'.

\\ Improved data security
With full data encryption and options that include industry-leading network behaviour analysis tools, intrusion detection, DDoS mitigation and multiple firewalls, our private cloud solutions are compliant with the most stringent industry regulations.

\\ Advanced reporting and analytics
We provide near real-time visibility of cloud performance so whether you want us to manage your cloud for you or if you prefer a DIY approach you can see what is going on.

\\ 24/7 support - Fully Managed, Self-Managed or Co-Managed
We provide three solution management options – Fully Managed, Self-Managed or Co-Managed. However you want your cloud managed, we will be monitoring 24/7 and providing you with the support and advice you need.

REQUEST A FREE CLOUD SERVICES CONSULTATION

Now, more than ever, the cloud is vital to help businesses reinvent and outmanoeuvre uncertainty. Whatever your cloud computing needs, we can provide a secure, fit-for-purpose environment, without any management and maintenance complexity.
