

DATA SHEET

SENSITIVE DATA DISCOVERY

Let the experts scan, source and audit, so you don't have to

Within GDPR, it's essential to have process control around Personal Identifiable Information (PII). This is any data that could potentially identify a specific individual. However, knowing where all that personal information is, is a challenge faced by many organisations. But what if there were tools that could help give

you visibility and deal with requests swiftly and appropriately?

This is where Nasstar comes in. Our latest technology enables all that personal information to be found and detailed, all in a single handy report, so you can handle any requests the way they should be – lawfully.

THE NASSTAR WAY

At Nasstar, we ensure all our customers are compliant with strict GDPR regulations. Whether you're a current customer or new to us, our Sensitive Data Discovery service is available to you as a standalone service, as and when you need it.

Utilise our tools to help keep you compliant, as well as saving your organisation time and costs.

KEY FEATURES

Get your records in line with government-backed standards

\\ Context-aware AI detectors for GDPR, PCI, LGPD, PHI and more

From faces to passwords, bank account numbers, credit cards, addresses to names, email, telephone, health information and political views – all this and more can be detected and interrogated.

\\ Local or remote targets

Whether your data is stored on-premise or in the Cloud, we can scan local and remote storage, including:

- Google Drive
- Microsoft 365, including OneDrive, SharePoint Online and OneNote
- Exchange Online
- Microsoft Azure Blob
- Amazon S3 buckets

- MSSQL
- Windows file shares
- Servers, laptops and workstations

\\ In-depth Detection

Our scanning tools look inside email attachments, images inside Word documents and nested archives – even the text inside images and optical character recognition (OCR) on scanned PDFs. Over 400 file formats can be analysed, saving you precious time.

\\ Reporting

Once the scanning is complete, we compile an output report. This provides you with the capability of controlling the personal data once you know where it all is, and the types of data and risks that exist for your organisation.

REQUEST A FREE DATA PROTECTION CONSULTATION

Whatever your size and setup, our team can help. If you would like to book a complimentary consultation or find out more about our GDPR compliance products, please contact enquiries@nasstar.com or call 0844 443 433
