CLOUD READINESS WORKSHOP

Making sure you're prepared and ready for cloud adoption

People often find that cloud adoption is a quick process to start, however, getting it right in a way that is manageable and scalable can be challenging.

We understand the business and technical factors that make cloud adoption successful. Our experience spans the complete cloud life-cycle – we plan, build, migrate and run cloud services.

Our Cloud Readiness Workshop has been designed to help organisations overcome these challenges and identify where you are on your adoption journey.

We work with you to:

> Review and assess objectives and plans for cloud adoption.

> Review organisational alignment for cloud usage.

> Discuss and review technical considerations and best practices as you move to the ready and adopt phases.

> Help you understand the capabilities and skills that you will need for cloud adoption.

DEFINE STRATEGY → PLAN → READY → ADOPT

GOVERN MANAGE

We believe that to get the best from a product or technology solution, you need to put the groundwork in. Cloud adoption is no different. You must ensure your chosen route to the cloud is going to work for your business.

We work with you to overcome challenges to cloud adoption, assessing your current position on your cloud journey and reviewing this against factors that support a successful cloud adoption. So, whether you're new to the cloud, or you've already started cloud migration, let us help you ensure you're going in the right direction.

KEY FEATURES

Putting the prep-work in to reap the benefits later

Best Practice
We apply our five pillars of Best Practice to everything we do, giving you peace of mind and ensuring you get the most from your projects.

Comprehensive analysis
Our workshop is designed to review your current cloud adoption plans and analyse them to ensure they are fit for purpose or make recommendations where they are not.

Recommendations
On completion of the workshop, we will present our findings from each area of analysis. We will also make suggestions for the next steps in your journey, ensuring our presentation can be easily shared between business and technical stakeholders.

ENQUIRE ABOUT A CLOUD READINESS WORKSHOP

We go beyond the mandate, combining ingenuity, agility, and integrity to shape solutions that meet the demands of emerging and future business challenges. There is always an alternative, smarter way to achieve business goals and we're here to help you do that.
