SECTOR CV

MANUFACTURING

Optimising business processes in the Manufacturing sector

Helping you adopt technology to gain a competitive edge

The Manufacturing sector has evolved significantly over time. Embracing cutting edge technologies and adapting to new digital systems has created greater efficiencies and transformed the industry's ability to innovate and optimise business processes.

However, progress is stalling, and manufacturing businesses are now in danger of being left behind. New technology deployments are getting stuck in pilot phases and disparate workforces are struggling to adapt to new ways of working and collaboration.

Unlocking the value of technology will be the key to enhancing productivity, cutting costs and improving efficiency and performance. Without adopting technology to optimise business processes, the industry is at risk of losing both customers and staff to the competition.

HOW DOES NASSTAR SUPPORT THE MANUFACTURING SECTOR?

Microsoft Teams
Effective collaboration is crucial. Microsoft Teams enables your users to communicate and collaborate effectively from any location, whether via voice, message, or video. This secure workspace also acts as an integration window for many other tools, products, and services within Office 365.

Microsoft Azure
Cloud services allow you to build, manage and deploy applications at scale using the right tools for business – even across a global network. From Hybrid Cloud to a full Azure system, we can help you to unleash exceptional performance in a cost-effective, dynamic, and secure way.

Strategic Consulting
With over 20 years of strategic consultancy, we can help you to design, plan and execute your IT projects at a pace to suit your business goals. Our teams can integrate your solutions effectively to deliver maximum business value and minimise disruption.

Managed IT
Our tailored managed IT packages offer as much or as little support as you need. With specialists available 24/7, we can deliver thousands of scheduled IT checks and maintenance tasks to ensure your IT operations are running smoothly.

Cyber Security

Our teams have developed a suite of protective technologies, automated monitoring tools and cyber threat detection tools to defend your business and secure your data. Our award-winning service can help reduce security risks while improving your resilience and protecting your reputation.

CASE STUDY: SAS INTERNATIONAL

A leading British manufacturer of quality metal ceilings and bespoke architectural metalwork, SAS International wanted to move from its legacy on-premise systems and embrace Cloud adoption and appointed Nasstar as its strategic IT supplier.

"We have a lean IT team so taking this responsibility out of our hands and giving it to Nasstar resolved a huge headache. With their help, we have delivered a step-change. From having zero systems in the Cloud just three years ago, today around 95% are now Cloud-based."
