## Who we are

#### Secure networks

Managed Detection and Response	Secure Network Fabric	ICC Cloud Connect	ICC Access
Comprehensive Threat Detection	Software Defined WAN/LAN	Azure Expressroute	Last Mile Connectivity
Threat Intelligence Integration	Secure OT	AWS Direct Connect	Fibre Ethernet
Advanced Analytics and Visibility	SASE	Google Interconnect	Next Gen Broadband

# Our Fortinet partner status

### Specialisations

These accolades are major milestones for Nasstar and mean our customers can be confident that our offerings are supported commercially and technically by Fortinet. We are committed to continually building on the relationship with our 'Gartner Magic Quadrant' leading partner and developing innovative cybersecurity solutions for our customers long into the future.

Darren Hogan, Director of Portfolio

# Ruthlessly secure

Fully integrated security that provides defence against the modern threat actor.

Flexible and modular: An approach that allows change to be embraced.

Rich insights: Improve user experience and reduce friction with a single service partner.

Highly integrated: Enables digitisation and automation.

**IloT Industry 4.0:** Provides a security framework for embracing the latest industrial revolution.

Imagine a network infrastructure that not only connects but also protects, evolving seamlessly with your business needs.

It provides a scalable and secure foundation for all your digital operations, ensuring that as your business grows and changes, your network remains robust, reliable, and ready to support your success.
